

Report of the Mineral Resources Contiguous to Line of Kansas City Southern Railway from Neosho, Mo., to Texarkana, Texas

By George Downman Fitzhugh

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1903 edition. Excerpt: .City. Accordingly, the examinations were commenced where the black shale of the Devonian Age --the most prominent mark of the existence of phosphate rock-- appeared en masse boldly. By referring to the attached plate (NO. 8), giving an ideal vertical section of this phosphate region, the relative position of the phosphate rock and accompanying rock strata will be best understood. Generally all of the rock strata are nearly level with a slight dip to southwestward. Occasionally a gentle reverse dip is found, but still the general dip is west of south. There are two strata of phosphate rock found in the region. The upper strata is located at the base of the black shale, and is of dark color; the lower strata is found in the Upper Silurian rocks, from fifty to two hundred feet below the upper strata, and is a white - ellow...
