Continuum Publishing Corporation. Paperback. Book Condition: new. BRAND NEW, Moral Realism, Kevin DeLapp, Are moral values objective or are they relative to different cultural contexts and traditions? Do values have any place in a 'disenchanted' scientific conception of the world and, if so, how do human beings relate to such values culturally, psychologically, and epistemologically? This book examines contemporary responses to these questions. Moral Realism introduces students to contemporary debates concerning moral realism, including issues related to ethical naturalism, moral epistemology, moral motivation, cultural pluralism and moral disagreement. In the context of examining and connecting these different debates, the book presents its own unique form of moral realism according to which values may be belief-independent while also being characterized by an ontological pluralism that generates incommensurable moral disagreements and 'tragic' dilemmas. This idea serves as a guiding thread and also represents an attractive and neglected metaethical position in its own right. Specific attention is devoted to locating debates about moral realism in actual, embodied contexts, by looking to issues in experimental moral psychology, cross-cultural anthropology and political science, permitting an accessible approach ideal for undergraduate students.
