

An Introduction to Using GIS in Marine Biology: Supplementary Workbook Six: An Introduction to Creating Custom GIS Tools

Filesize: 1.52 MB

Reviews

This pdf might be well worth a study, and a lot better than other. It really is simplistic but excitement inside the fifty percent in the book. Its been printed in an exceedingly straightforward way which is just after i finished reading this ebook through which really modified me, modify the way i believe.
(Derick Brekke)

AN INTRODUCTION TO USING GIS IN MARINE BIOLOGY: SUPPLEMENTARY WORKBOOK SIX: AN INTRODUCTION TO CREATING CUSTOM GIS TOOLS

Pictish Beast Publications, United Kingdom, 2014. Paperback. Book Condition: New. 254 x 203 mm. Language: English . Brand New Book ***** Print on Demand *****.This book is the sixth companion volume to An Introduction To Using GIS In Marine Biology . It is designed to augment the information on using GIS in marine biology provided in that book, and, indeed, to be used alongside it rather than to be used independently as a stand-alone volume. Therefore, this book will be of most interest to those who have already read An Introduction To Using GIS In Marine Biology . This book consists of five exercises covering the practical use of GIS in marine biology using ESRI's ArcGIS(r) 10.2 GIS software. These exercises are based around the creation of custom GIS tools to automate tasks which need to be done on a regular basis. These start with the creation of relatively simple tool to plot species locational data before progressing on to the creation of more complex custom tools and creating the appropriate metadata to accompany custom GIS tools. The exercises are designed to be followed in the order they are presented, and work with a specific data set which can be downloaded for free. Working through these five exercises will help the novice GIS user obtain experience in creating custom GIS tools, and so develop their GIS skills. Unlike most other GIS tutorials, this information is specifically presented in a marine biological context and all the exercises use real data from a marine biological study. Therefore, these exercises are more likely to provide the kind of experience in using GIS that marine biologists will find useful and applicable to their own research. These exercises are presented in the same easy-to-follow flow diagram-based format first introduced in the How To. section...
